Nicholas Steven Darmawan

(650)-781-2020 | nicholassteven998@gmail.com | ndarmawan@ucdavis.edu | https://github.com/steve1998 | http://steve1998.github.io

OBJECTIVE:

To look for internship opportunities to get field experience to increase my programming and problem-solving skills, especially front-end web development and full-stack web development, as well as applying what I have learned in college and getting exposure to the industry.

EDUCATION:

UNIVERSITY OF CALIFORNIA, DAVIS, CA
B.S. IN COMPUTER SCIENCE | EXPECTED JUNE 2020

EXPERIENCES:

- IT support for College of Engineering at UC Davis (Fall 2018 - Present)
    - Handle software installations and bug fixing for staff
    - Reimaging of staff computers, and deploying them to their workstations
    - Solving network issues
- Member of #include at UC Davis (Fall 2018 - Present)
    - Currently handling the Imani Clinic project
- Volunteered as logistics member for Picnic Day, UC Davis (Spring 2017)
- Design Committee for High School (2014)

PROJECTS:

- Currently making a budgeting app (Ongoing)
    - Used Angular as the front-end, and Node.JS and Express to set up the back-end server
    - MongoDB implementation ongoing
- Made TL;DR for HackDavis 2019
    - Note annotator app that summarizes paragraphs
    - Utilized Google's NLP API
    - Built with HTML, CSS, JavaScript and jQuery
- Currently part of Imani Clinic Project – Developed contact page
    - Used Node.JS and nodemailer to send contact information through email
    - Built with HTML, CSS, and JavaScript
- Made Cuaca, a weather web page
    - Used OpenWeather's API to get weather data on a city
- Java unit testing (JUNIT) and docker hot-swapping using nginx for class work
- Simulated a defragmenter in the console
- Implemented a calendar in C++ that can read in and create events in the console

SKILLS:

- C++ / C, UNIX, Data Structures and Algorithm Analysis
- HTML5, CSS (Bootstrap, MaterializeCSS, Bulma), JavaScript, Git, GitHub
- Used a bit of Python, Angular, Node.js, and ExpressJS
- Knowledge of the AGILE Methodology
